GENESTO A/S		
This International Search Report has bee according to Article 18. A copy is being to	en prepared by this International Search ransmitted to the International Bureau.	ing Authority and is transmitted to the applicant
This International Search Report consists	s of a total of 6 sheet	s.
X It is also accompanied by	y a copy of each prior art document cite	d in this report.
Basis of the report a. With regard to the language, the language in which it was filed, ur	e international search was carried out or nless otherwise indicated under this item	n the basis of the international application in the
The internationa this Authority (R	I search was carried out on the basis of ule 23.1(b)).	a translation of the international application furnished to
b. X With regard to any nucle	eotide and/or amino acid sequence di	sclosed in the international application, see Box No. I.
2. Certain claims were for	und unsearchable (See Box II).	
3. Unity of invention is la	cking (see Box III).	
4. With regard to the title,		
X the text is approved as s	submitted by the applicant.	
the text has been estable	ished by this Authority to read as follows	s:
		•
5. With regard to the abstract,		
1	submitted by the applicant.	s Authority as it appears in Box No. IV. The applicant
may, within one month	rom the date of mailing of this internation	anal search report, submit comments to this Authority.
6. With regards to the drawings,		
a. the figure of the drawings to be	published with the abstract is Figure N	o
as suggested b	y the applicant.	
	this Authority, because the applicant fail	
`	this Authority, because this figure better	characterizes the invention.
b. X none of the figures is to	be published with the abstract.	

Form PCT/ISA/210 (first sheet) (January 2004)

INTERNATIONAL SEARCH REPORT

PCT/DK2004/000492

Вох	No. I	Nucleotide and/or amino acid sequence(s) (Continuation of item 1.b of the first sheet)
1.	With	regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed nation, the international search was carried out on the basis of:
	a.	type of material
		X a sequence listing
		table(s) related to the sequence listing
	b.	format of material
		X in written format
		X in computer readable form
	c.	time of filing/furnishing
		contained in the international application as filed
		filed together with the international application in computer readable form
		x furnished subsequently to this Authority for the purpose of search
2.		In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

A. CLASSIFICATION OF SUBJECT MATTER IPC 7 C07K16/12 C07K16/46

G01N33/569 G0

C. DOCUMENTS CONSIDERED TO BE RELEVANT

C07K16/46 C12N15/13 G01N33/577 A61K39/395 C12N15/62 A61K39/40 C12N5/10

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols) IPC 7 C07K

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, BIOSIS, EMBASE, CHEM ABS Data, WPI Data, PAJ, Sequence Search

characterization of a monoclonal antibody to Streptococcus pneumoniae pneumococcal surface adhesin A (PsaA) protein." INTERNATIONAL SEARCH REPORT

PCT/DK2004/000492

Box II	Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)
This In	ternational Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1. χ	Claims Nos.: 37 (partially, for reasons of industrial applicability) because they relate to subject matter not required to be searched by this Authority, namely:
	Although claim 37 is directed to a diagnostic method practised on the human/animal body, the search has been carried out and based on the alleged effects of the compound/composition.
2.	Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3.	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box II	Observations where unity of invention is lacking (Continuation of item 3 of first sheet)
This In	ternational Searching Authority found multiple inventions in this international application, as follows:
1.	As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2.	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3.	As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4.	No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
Rema	The additional search fees were accompanied by the applicant's protest.
	No protest accompanied the payment of additional search fees.
